

Request for pathology report not to be sent to My Health Record

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system.

If your patient does not want a pathology report uploaded to My Health Record, the pathology laboratory should be notified by completing the step below. This will not affect your current business process of requesting and receiving pathology reports, it simply stops the information being sent to your patient's My Health Record on this occasion. We encourage you to discuss this with your patient as having access to test results in their My Health Record may improve their future healthcare.

STEP 1:

To request a pathology report not be uploaded to My Health Record, tick '**Do not send reports to My Health Record**'.

The screenshot shows a pathology request form with the following fields and options:

- Buttons: Save as Draft, Save and Complete, Send and Complete, Print and Complete, Paper
- Request Date: 26/11/2018
- Lab: QML Pathology With Label
- Referred By: Ms MMEx Light Training
- Copy To: My Health Record
- Checkbox: Do not send reports to My Health Record

This request will apply to all results on the request form. If you or your patient want other results in the form to be uploaded to My Health Record, a separate form may be used only for those results that your patient requests not be uploaded.
