

Accessing Immunisation Information

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their individual healthcare identifier (IHI) has been validated in your system

STEP 1:

To access the patient’s My Health Record, click on the **My Health Record** icon. Enter your authentication initials and password, then click **OK**.

STEP 2:

A **My Health Record Access** pop-up will appear. Select **Gain Access (to all “General Access” eHealth record or documents)** and click **OK**.

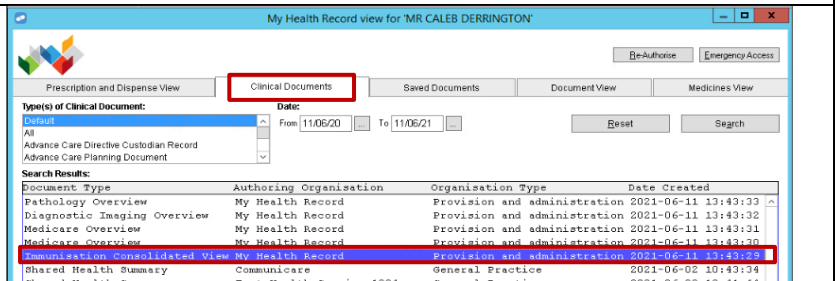

Note: If the patient restricted access to their record and has provided you with an access code, then select the “Gain Access with access code” option. Enter the code and click **OK**.

STEP 3:

The My Health Record view window will appear. Select the **Clinical Documents** tab and click on the **Immunisation Consolidated View**.

Double click to open and view the document.

STEP 4:

The **Immunisation Consolidated View** will display with the **Australian Immunisation Register (AIR)** tab displayed by default. Details of a patient's immunisations as recorded in the **Australian Immunisation Register (AIR)** will be displayed here.

Information will include the date of vaccination, dose number, brand administered and disease/indication.

Next immunisation/s due will display if the patient is due for a vaccination.

If there is additional information recorded in the AIR, this is displayed in a **Notice/s** section. This may include details about immunisation exemptions.

A National Immunisation Program (NIP) Status may also display for patients receiving immunisations under the program with corresponding text to confirm if the patient is up to date with recommended vaccines.
